

## 2008 LEXUS SC Interior

The interior of the SC features fine wood trim throughout the cabin and hand-stitched, leather-trimmed seating. Both front seats are heated and power-adjustable, with two-position memory systems that actually conform to your body for a custom fit. The memory system will even restore the steering wheel and side-view mirrors to your preferred positions. In addition, the handsome wood- and leather-trimmed steering wheel is equipped with audio controls in the interest of keeping your attention on the road ahead.
