2020 LEXUS

Craftsmanship born from passion.
Technology that marries innovation and emotion.
Performance pushed to breathtaking heights.

Experience a flagship vehicle
that transcends every standard of prestige.

The 2020 Lexus LS

LS 500

Built upon the platform of the high-performance LC coupe, and adopting a sporty, coupe-like profile, the LS boasts a twin-turbocharged 416-hp¹ V6 engine paired with a thrilling 10-speed automatic transmission. And, offering three premium wood trim designs so unique they can take up to four months and 32 steps to complete, it immerses you in craftsmanship like none other.

LS 500h

Pairing a potent 3.5-liter V6 engine with powerful electric motors and a lightweight lithium-ion battery, the Lexus Multistage Hybrid Drive system delivers seamless acceleration and torque without requiring a charge. Providing you the direct, instinctive feel of a 10-speed automatic transmission, this is efficiency at the peak of luxury.

LS 500 F SPORT

Featuring LFA-inspired gauges; 28-way power, bolstered front sport seats; larger brakes; aluminum pedals; and our most advanced available vehicle dynamics control system yet, the LS F SPORT delivers the most engaging LS driving experience ever. And the exclusive Performance Package with Active Rear Steering and active stabilizers pushes the intensity even higher.

DESIGN THAT STIRS

Experience the culmination of thoughtful design and unconventional craft.

Countless steps in the search for one pure emotion. That's the design philosophy behind our most evocative LS yet. With its sleek, coupe-like profile, evocative Premium Triple-Beam LED headlamps and available Art Wood trims like a herringbone design that demands the same process used to craft top-quality musical instruments, including being arranged and sliced by hand, the 2020 LS represents the pinnacle of distinctive design.

THE ART OF HOSPITALITY

Omotenashi is the Japanese concept of hospitality, and the artfully crafted interior of the LS is the ultimate expression of it. This interior isn't just responsive—it's revelatory. The enhanced available electronically controlled Adaptive Variable Air Suspension system not only helps to maintain the vehicle's low center of gravity while driving, but it can also automatically raise the vehicle to make it even easier to step into or out of the LS. In addition, the available outboard seat-cushion side supports automatically adjust to facilitate a smooth, easy entry and exit, as well as to fit comfortably to your body while you're seated.

LS shown with Parchment leather and Art Wood Organic interior trim

LS shown with Parchment leather and Art Wood Organic interior trim

WORLD-CLASS CRAFTSMANSHIP

ART WOOD ORGANIC

Sustainably and responsibly sourced from the *Agathis* tree, available Art Wood Organic trim features a vibrant grain pattern reminiscent of flickering flames. Like nothing else in an automobile, or in nature itself, it's created by a *takumi* craftsman slicing multiple sheets of wood across the grain and applying a natural gloss to enhance the vibrancy.

AMBIENT LIGHTING

Inspired by the warm glow of traditional Japanese *andon* lanterns and the welcoming spirit of *omotenashi*, soft LED illumination warmly invites the driver and passengers into the cabin. And light sources behind the armrest and door trim give the impression that the armrest is elegantly floating, adding to the serene atmosphere.

POLISHED MAGNESIUM DETAILS

With fluid, delicate lines reminiscent of the traditional Japanese harp (*koto*), the dash accents of the LS are made of magnesium because of its unique tactile qualities. The manufacturing process requires several layers of surface treatment in order to create the distinct feel and dynamic appearance.

KIRIKO CUT GLASS

With its delicately etched pattern and luminous glow, available *Kiriko* glass is designed by hand to catch the eye and light. Then a laser-scanning technique creates data from ten thousand different cuts in order to capture the uniqueness of this human touch. Each piece of glass requires up to 147 points of polishing, which can take hours to complete.

HAND-PLEATED TRIM

Created from a single piece of cloth, the available hand-pleated interior trim is a tribute to the art of origami. Simple yet painstakingly crafted, this masterful trim started as true origami and took four years to develop. The final expression is so complex and precise that it can only be folded by human hands.

VISIONARY FORM. VISCERAL FEELING.

Technology in the LS has never been more advanced, yet commanding it has never been this easy. By aligning the lines of the dash horizontally, the LS helps to deliver vehicle information more easily because of the reduced vertical eye movement required by the driver. And the meticulously crafted steering wheel is the result of rigorous testing and track development with Lexus *takumi* masters. By measuring the distribution of palm pressure on the wheel during countless hours of test-driving, designers were able to dynamically vary the shape in order to provide optimum grip everywhere on the wheel, forging an incomparable connection to the road that you won't see coming. Or soon forget.

LS shown with Parchment leather and Art Wood Organic interior trim

LS shown with White leather and Art Wood Herringbone interior trim

FIRST-CLASS LUXURY: *THE EXECUTIVE PACKAGE*

To achieve the finest passenger experience we've ever created, the Executive Package offers two exceptional levels of refinement. In addition to generous rear legroom, Lexus Climate Concierge and rear-seat butterfly headrests, the first level also features an extendable right-rear ottoman,^{3,4} an impressive rear-seat reclining angle, and heated and ventilated rear seats with a massager. The second level of the package offers the remarkable style of *Kiriko* glass and hand-pleated trim. To help you make the most of every indulgence, the rear-seat passenger control panel enables you to manage the finest details—from individual climate zones to seven different massage settings.

PERFORMANCE THAT INVIGORATES

Experience engineering crafted to not just move you, but move the entire industry forward.

LS F SPORT shown in Ultra White

From the powerful twin-turbo LS 500 to the groundbreaking Multistage Hybrid system in the LS 500h, this is invigorating performance on demand. Boasting a thrilling Adaptive Variable Suspension for razor-sharp handling and an even more daring LS F SPORT that offers our most advanced vehicle dynamics control system to date, the LS proves that only unconventional engineering can create unparalleled results.

TWIN-TURBO POWER. *PERFORMANCE, ELEVATED.*

Connecting with the driver in unprecedented ways demands engineering that's just as extraordinary. Consider the twin-turbo engine in the LS 500. While most carmakers outsource their turbocharger development, Lexus researched, tested and crafted the turbochargers in the LS 500 in-house—something almost unheard of in the industry. This powerful 416-hp¹ V6 engine is paired with an equally exhilarating 10-speed Direct-Shift automatic transmission. It delivers the optimal gear for a wide variety of driving conditions and one of the fastest shift times among conventional automatic transmissions.⁵ This is performance technology designed to create a response from the vehicle—and evoke one in the driver as well.

LS shown in Manganese Luster²

DUAL POWER SOURCES. FIRST-CLASS PERFORMANCE.

The LS 500h is the first multistage hybrid prestige luxury sedan, and, with the instinctive feel of a 10-speed automatic transmission, the most responsive and fastest LS Hybrid we've ever created. Built on an advanced powertrain, it boasts a combined 354-hp,^{1,6} 24-valve gas engine, powerful yet compact electric motors, and our lightest, most compact lithium-ion battery. With these groundbreaking innovations, the LS 500h is the breakthrough that recasts the entire concept of excellence in the category.

LSh shown in Liquid Platinum

ALL-WHEEL DRIVE. ALL POWERFUL.

Never sacrifice style for capability with all-wheel drive, available on every LS model. Full-time all-wheel drive delivers engine power to all four wheels, and a Torsen^{®7} limited-slip center differential efficiently distributes it between the front and rear axles, helping optimize traction, handling and control in a variety of driving conditions.

LS AWD shown in Manganese Luster²

LS F SPORT shown in Atomic Silver

F SPORT PERFORMANCE

The razor-sharp handling of the Lexus high-performance line meets aggressive, track-inspired design with the LS F SPORT. Sharing a platform with the intense LC coupe and DNA with the LFA, it includes a specially tuned suspension system engineered by the same team behind the iconic supercar. Beyond larger brakes, optimized brake pads⁸ and deeply bolstered front sport seats, you can take the exhilarating drive even further with the LS Performance Package. Boasting Variable Gear-Ratio Steering, Active Rear Steering and active stabilizers, it also features our most advanced vehicle dynamics control system—the first to control all six forms of vehicle movement.

F SPORT STYLING

The F SPORT is a passionate expression of pure performance, both inside and out. Exclusive exterior styling features include F SPORT 20-inch wheels⁹ with Dark Graphite finish, a dynamic front fascia and mesh grille, exterior badging, darkened chrome lower trim, and large six-piston front and four-piston rear brakes. On the inside, F SPORT bolstered 28-way power front seats feature an exclusive perforated L-motif pattern. And aluminum pedals, a perforated leather-trimmed shift knob and steering wheel, LFA-inspired sliding instrumentation, and an Ultrasuede^{®10} headliner are just a few indicators of the passion that lies under the hood.

LS F SPORT shown with Circuit Red leather and Naguri Aluminum interior trim

LS shown with White leather and Art Wood Herringbone interior trim

INNOVATION THAT INSPIRES

Experience world's-first
technology that anticipates every
need and elevates every moment.

The most advanced safety system ever offered on a Lexus. The world's first Mark Levinson®¹¹ Quantum Logic® Immersion audio system. Lexus Enform¹² smartwatch functionality.¹³ With cutting-edge safety innovations and leading-edge in-vehicle technology, every touchpoint in the LS was crafted around the driver's every desire. For added visibility, it offers a 24-inch Head-Up Display—one of the world's largest¹⁵—that not only projects key information such as speed, current gear and rpm onto the windshield, it's also one of the first displays to warn you about the possibility of pedestrians¹⁴ or cross traffic ahead.¹⁵

NEXT-GENERATION CONNECTIVITY. NEXT-LEVEL CONVENIENCE.

APPLE CARPLAY®

With Apple CarPlay¹⁶ integration, you can access the same familiar interface from your iPhone^{®17} through the vehicle's multimedia display. Simply connect your iPhone to get directions, make calls, send and receive messages via Siri,^{®18} and get access to your favorite apps like Waze, Spotify[®] and Apple Audiobooks.^{TM19}

AMAZON ALEXA

Bring all the convenience of Amazon Alexa²⁰ on the road with the Lexus+Alexa app.²¹ Using only your voice, you can easily access thousands of the same features and skills you get with Alexa at home. Listen to audiobooks, stream Amazon Music,²⁰ make lists, check the weather, get news briefings and much more. You can also use it to control compatible smart-home devices such as lighting, thermostat and security systems. Offering added in-vehicle convenience, Alexa even syncs to your Navigation System²² to provide on-the-go recommendations.

LEXUS ENFORM

Lexus Enform¹² elevates connected technology and provides concierge-level convenience. From emergency assistance and onboard Wi-FiTM to the ability to start your engine remotely¹³ using your smartphone, smartwatch, the Lexus skill on Amazon Alexa²⁰ built-in devices, or the Lexus action on Google Assistant-enabled²³ devices, our premium suite of connected technology offers peace of mind with every drive.

DELIVERY AND TECHNOLOGY SPECIALISTS

To help you get the most out of these and other features in your new Lexus, a Vehicle Delivery Specialist will walk you through nearly every setting and function you desire. And to answer questions that arise after delivery, a Vehicle Technology Specialist can offer expert guidance in person or without you ever leaving the driveway via camera-enabled apps like FaceTime.^{®24} Learn more about these services at lexus.com/specialists.

LS shown with White leather and Art Wood Herringbone interior trim

EVERY ELEMENT DESIGNED AROUND YOU

Inspired by *omotenashi*, the Japanese concept of hospitality, our vision is to anticipate the driver's needs and form a relationship that is seamless and intuitive. That's why we partnered with Mark Levinson®¹¹ to create the world's first audio system that delivers a totally unique, totally immersive listening experience for every occupant in the vehicle. Featuring 23 speakers (including four in the ceiling), it creates one of the largest sound stages in the industry. And with Quantum Logic® Immersion, it also offers one of the most sophisticated 3D audio technologies available in an automobile. To further envelop you in the inviting interior, the LS features four customizable temperature zones throughout the cabin, available 28-way adjustable front seats, and a seat-cushion extender on the front-seat edge that can extend to fully support your thighs.

PEACE OF MIND, STANDARD

Presenting Lexus Safety System+ 2.0, an integrated suite of class-leading standard active safety equipment.^{5,25}

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION

By enhancing the radar and camera capabilities, it's now possible for the system²⁶ to help detect not only the vehicle ahead, but also a preceding bicyclist in daytime and even a preceding pedestrian in daytime and low-light conditions.²⁷ Should it detect a potential frontal collision, it can help automatically brake the vehicle to a stop.

LANE TRACING ASSIST

When All-Speed Dynamic Radar Cruise Control²⁸ is enabled, this hands-on system²⁹ monitors visible lane markings or the path of the preceding vehicle to help the driver keep their vehicle centered in the lane by providing steering assistance. Designed for added convenience and to help reduce driver strain, the system can even be used in traffic and on highways with gradual curves.

LANE DEPARTURE ALERT WITH STEERING ASSIST

This system³⁰ utilizes a camera to monitor visible lane markings. If an inadvertent lane departure is detected at speeds above 32 mph, the system is designed to warn you so that you can steer back into the lane, and can even take slight corrective measures to help keep you within your visibly marked lane.

ROAD SIGN ASSIST

This system³¹ uses a built-in camera to help provide road sign information in the instrument panel or even on the available Head-Up Display. In addition to displaying speed limit information, the system can alert you of certain detected signs you otherwise might have missed.

ALL-SPEED DYNAMIC RADAR CRUISE CONTROL

This system²⁸ uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. Whether at highway speeds or in stop-and-go traffic, the system is designed to detect if you get closer than the preset distance and automatically slow your vehicle—even to a complete stop. If driving at highway speeds and the road ahead clears, your Lexus returns to its preset speed.

INTELLIGENT HIGH BEAMS

To help provide greater visibility for you as well as other drivers, Intelligent High Beams³² offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it detects the headlamps or taillamps of vehicles ahead.

OUR MOST ADVANCED SAFETY SYSTEM YET: *LEXUS SAFETY SYSTEM+ A*

Honed on one of the most complex highway systems in the world, the Tokyo Metropolitan Expressway, available Lexus Safety System+ A is the pinnacle of Lexus driver assistance systems.³³ It includes our most advanced lane assistance technologies,^{29,30} as well as a way for the LS to scan the road ahead and alert you if a pedestrian is on a trajectory to make an impact with the vehicle.¹⁴ This highly intelligent system now helps you manage your speed around curves to handle turns with added confidence. The LS can also help brake or steer away if it detects an impending collision,³⁴ while still remaining in its lane. And with Lane Change Assist,³⁵ the LS is even designed to help automatically change lanes for you when it's safe to do so. It's one step closer to realizing our vision of an accident-free world.
