LX 570
5.7-liter V8, six-speed automatic transmission, dual Variable Valve Timing with Intelligent (VVT-i), full-time four-wheel drive (4WD).
DO EVERYTHING YOU CAN IMAGINE.
AND A FEW MORE THINGS THAT YOU CAN’T.
THE UNPARALLELED 2014 LX.
The LX isn't just spacious. With three rows and room for eight passengers, it's also extremely versatile. The power-sliding second-row seat offers a 40/20/40-split seatback to fit a variety of items. And, with the press of a button, the 50/50 split third-row seats stow to the side in seconds.
The available 450-watt Mark Levinson® Reference Surround Sound Audio System was tuned for more than 6,000 hours to optimize the acoustics in the LX. As a result, it features 19 speakers and 7.1-channel architecture that delivers multi-dimensional sound and musical clarity once reserved for six-figure home theater systems.
EXCEPTIONALLY CIVILIZED.

Even if your surroundings no longer are.
Personalized comfort and craftsmanship can be found throughout the cabin. The driver’s power seat features heating and available ventilation, along with 14-way adjustability. The supple leather trim is crafted from the highest-quality full-grain stocks, including available semi-aniline leather. And the exclusive Mahogany wood accents are individually selected for consistent color and grain.
VISIBILITY
To provide enhanced visibility, the LX features a backup camera. And to help you see around blind corners, such as when exiting a parking garage, there is an available Wide-view Front and Side Monitor system. For added convenience, a second camera located underneath the passenger side-mirror is particularly useful when navigating narrow passageways and tight parking spaces.

CAPABILITY
With the simple press of a button, Crawl Control is designed to maintain an optimal low and steady pace over challenging terrain, while Turn Assist can tighten your turning radius by adding brake force to the inside rear wheel. Other innovative features include Active Height Control, an Adaptive Variable Suspension and Multi-Terrain Select, which optimizes traction based on the selected terrain.

V8 POWER
The go-anywhere, do-anything LX combines the power of a 383-hp V8 with the grace of a six-speed sequential-shift transmission, which helps provide optimal acceleration, efficiency and seamless shifting. Plus, the Dual Variable Valve Timing with intelligence system (VVT-i) improves towing power and boosts performance at higher speeds.

CLIMATE CONTROL
With 28 vents throughout the cabin, the LX features a standard first-in-class four-zone climate-control system that allows you and your passengers to select individual temperature settings. And along with adjustable heated front seats and available heated second-row seats, the LX boasts an available heated steering wheel and even a windshield-wiper deicer.

PRE-COLLISION SYSTEM
To help you prepare for and, if possible, avoid potential frontal collisions, an available Pre-Collision System is designed to watch the road ahead for obstacles and warn you of their presence with beeps and visible indications.

ENFORM WITH APP SUITE
Available Lexus Enform® and Safety Connect® offer more than the convenience of live, 24-hour navigation assistance and the peace of mind of knowing emergency services can be requested at the press of a button. With the subscription-free App Suite, making dinner reservations, ordering movie tickets and personalizing your Pandora® playlist has never been easier.

REAR-SEAT ENTERTAINMENT
The available dual-screen Rear-Seat Entertainment System (RSES) allows the left and right rear-seat passengers to enjoy separate entertainment. With 70-inch LCD screens located behind the driver’s and front passenger’s headrests, the system features a pair of wireless headphones and can be used as a DVD player, audio player or game console via audio and video input jacks.

CONVENIENCE
The LX is as capable as it is convenient. Along with its power second- and third-row seating for easy cargo loading, there’s a power rear door with an accommodating clamshell design. The lower tailgate can be manually raised and lowered, adding cargo access. And as an added bonus, the available cool box is neatly integrated in the front console under the center armrest to keep your beverages nicely chilled.

SURROUND YOURSELF WITH INNOVATION, LUXURY AND PERFORMANCE.
403 lb-ft torque @ 3,600 rpm
90% of maximum torque available @ 2,200 rpm
7,000 pound towing capacity

7,000-LB TOWING CAPACITY TAKEN TO AN ART FORM.

Previews: NBC Sports Group/Press Sports

7,000 lb towing capacity available with Trailer Sway Control™ system. Lexus towing equipment (towing receiver hitch) available.
G. Available Wide-view Front and Side Monitor system
H. Black leather interior with Mahogany trim
I. Available Rear Seat Entertainment System (RSES)
J. Electroluminescent instrumentation with multi-information display
