Obsessively designed.
Methodically engineered.
Passionately crafted.

Because making a massive leap forward means nothing if it doesn’t lead to the experience of something greater.

The 2019 Lexus LC.

Experience Amazing
LC 500
Experience a world-class luxury coupe crafted for a new era of uncompromising performance and design. A platform built specifically for the LC; enhanced steering, suspension and breaking systems; an exhilarating zero to 60 time\(^1\), and a thundering engine note all come together to create the most responsive vehicle in the Lexus line.

LC 500h
Experience a profound shift in hybrid performance. Hit the pedal and feel the roar as breakthrough Lexus MultiStage Hybrid Drive pairs a potent gas engine with powerful electric motors to put on a truly invigorating performance—and puts the entire category on notice.

To bring a breakthrough concept vehicle into reality, we had to go to extremes. To engineer a car that dominates on the track as well as rewards the driver, we took everything even further.

Our most powerful creation is more than a car. It’s a feeling.

A MONUMENTAL LEAP
All that power means nothing if it doesn’t make you feel something. With an impressive 5.0-liter V8 engine, 471 horsepower,1 and a blistering 4.4-second zero-to-60 time,2 the LC 500 is finely tuned to give the driver a full-throttle experience. Take it up to its 7,300-rpm redline, and the Active Sport Exhaust delivers a potent, full-throated engine howl unlike anything you’ve ever heard. Or felt.

A 10-speed Direct-Shift automatic transmission with magnesium paddle shifters was specifically designed for the LC. Further refined for the 2019 LC, this exclusive transmission has one of the fastest shift times among conventional automatic transmissions,3 changing gears in 0.12 seconds. Or, half the time it takes the average human to blink. The system also learns your habits every time you drive, selecting the optimum gear based on vehicle speed, acceleration and your driving habits—even choosing the ideal gear while cornering.
Experience the front-engine, rear-wheel drive platform developed specifically for the LC. Uniting dynamic proportions with ground-hugging luxury coupe elegance, the front-midship design with a double-joint multilink suspension system delivers the ideal balance in every way—from the near-perfect weight distribution to the combination of exceptional handling, stability and ride comfort. Such equilibrium was achieved by placing the engine’s central mass behind the front axle, positioning the wheels close to the vehicle’s outer edges, and lowering the hood height and driving position. The result is one of the most direct, precise driving experiences we’ve ever created—and that you will ever encounter.

THE POWER TO CONTROL

A near-perfect weight balance so you don’t have to sacrifice power for control.
NO MEASURE
TOO EXTREME

Masterfully crafted, then relentlessly tested and scrutinized to deliver a groundbreaking vehicle that lays the groundwork for the future of Lexus high performance.

The LC wasn’t just about creating the definitive performance car; it was about redefining performance for Lexus. Which meant going to extremes. Decades of takumi craftsmanship and a tradition of relentless engineering and refinement were taken even further. Everything was pushed to the limit to deliver this high-performance, high-strength coupe. A high-tensile steel chassis was built to lower the driving position by just 10 millimeters. Intake valves were made of titanium to make them a few grams lighter. An available carbon fiber roof was developed to lower the vehicle’s center of gravity. Lightweight carbon fiber–reinforced sheet-molding compound allowed the complex shape of the inner doors to be molded as a single piece, and the outer doors were engineered with 6000-series aluminum that’s 47% lighter than its steel counterpart. Materials were evaluated by weight, strength, mass and optimal placement. And then reevaluated for one purpose—the driver’s connection to the road.
Feel the adrenaline as lightning-fast electric motors and a powerful gas engine propel you to 60 miles per hour in a mere 4.7 seconds."

It’s a difference you’ll feel instantaneously. The LC 500h is built on an advanced Lexus Multistage Hybrid powertrain—a 3.5-liter, 24-valve Atkinson-cycle V6, powerful yet compact dual electric motors and a lightweight lithium-ion battery. With 354 total system horsepower, rhythmic shifting and thrilling power off the line, the LC 500h signals a major shift in the category. You’ll feel the rush of instant torque the moment you press the pedal, and continuous, seamless acceleration that increases as the engine power and vehicle speed climb. Along with the instinctive feel of a 10-speed transmission through magnesium paddle shifters, the impact of our most responsive, fastest and highest-performance hybrid will be felt through the entire category. Because there’s more to h than hybrid.
A dynamic, low body with menacing, wide shoulders. An aggressive, broad stance. An impossibly low center of gravity. Every design note is engineered to provide direct, responsive performance. With four air intakes and rear aero ducts to help reduce lift and drag, even the air itself contributes to the high-speed handling. By bringing all these elements together, the LC stands apart.

A REVOLUTIONARY APPROACH

Every step of the design and engineering process demanded everything from our engineers, who demanded nothing less than amazing.
DESIGN

WITHOUT COMPROMISE

Every decision was made in service of the coupe’s final form, which seamlessly unites beauty with purpose. And unites you with the LC.

A study in uninhibited passion and exhilaration, the LC demanded a completely different approach to design and engineering. A single character line that took months to perfect. Twice the number of engineering checkpoints than any Lexus before it. Any sacrifice of design or performance was unacceptable. The driving experience ultimately had to be as inspiring as the final form.

LCh shown in Nightfall Mica // Options shown
ABSOLUTE PRECISION

An unwavering attention to detail, impeccable materials and countless hours crafting the LC not just for how it feels, but for how it makes you feel.

No detail was spared when creating the LC. The painstakingly crafted steering wheel, which provides optimal grip when cornering, is the result of countless hours of testing and track development with Lexus takumi masters. Alcantara®-trimmed door panels with deep, undulating lines form a distinctive look and feel. A leather-trimmed shift knob was crafted from four strips of high-quality leather that were then meticulously hand-sewn. And ambient illumination accentuates the bold contours and details throughout the cabin. Every element was carefully considered to elevate the driver's connection to the road. Even the alignment of the driver's hip point with the vehicle's center of gravity was studied carefully. Because extreme craftsmanship isn’t only about creating an exceptional finished product. It’s about creating an even more exceptional feeling when you get behind the wheel.
AVANT-GARDE IS IN THE DETAILS

PREMIUM TRIPLE-BEAM LED HEADLAMPS
The triple-projector ultra-compact LED headlamps are more than striking. They’re among the thinnest LED projector headlamps in the industry.1 Half the size of conventional lamps, the polaric ellipsoid system combines with the daytime running lights and LED cornering lamps to create an unmistakable Lexus signature.

21-INCH FORGED ALLOY WHEELS
Available 21-inch forged alloy wheels6 offer a lightweight design, black-and-chrome coating and a polished finish.

FLUSH EXTERIOR DOOR HANDLES
A flush-surface door handle with illumination enhances aerodynamics and creates a sophisticated first impression. When the handle is extended outward, inset LEDs illuminate the door. As the doors close, or after 15 seconds, the lighting fades.

DIMENSIONAL REAR COMBINATION TAILLAMPS
One of the most stunning features of any Lexus vehicle to date, the dimensional taillamps were inspired by the dramatic glow of a jet’s afterburners. Through the adoption of the infinity mirror principle, an endless, dimensional motif is illuminated when lamps are on, and a sleek gray look appears when off. Eighty LEDs on either side create an even illumination with impressive depth and no visible grain.

TOURING PACKAGE

Experience iconic style with the available Touring Package. Semi-aniline leather–trimmed front seats with an Alcantara® headliner, Mark Levinson® Reference Surround Sound Audio System, and the choice of 20- or 21-inch forged alloy wheels bring added refinement to our most polished coupe yet. While a Blind Spot Monitor® with Rear Cross-Traffic Alert® and Intuitive Parking Assist® offer added convenience and peace of mind.
For a higher level of performance, the Sport Package offers advanced track-developed features like a TORSEN® limited-slip differential¹ (LC 500) that distributes engine power to the rear axle for optimized traction. Alcantara®-trimmed sport seats with eight-way power support are specially engineered for high-G cornering and circuit driving. The high-back seats are designed to help maintain the ideal posture, and the textured leather trim helps grip the driver’s back—even against significant lateral G-forces. The available Sport Package also offers a glass or carbon fiber roof, lightweight forged alloy wheels, Intuitive Parking Assist,¹⁰ and Blind Spot Monitor® with Rear Cross-Traffic Alert.⁹

³⁴³
PERFORMANCE PACKAGE

For the most demanding driving enthusiasts, the available Performance Package offers all the track-ready features of the Sport Package, plus Active Rear Steering to enhance stability, Variable Gear Ratio Steering, an Alcantara® headliner, and a speed-activated rear wing that extends at speeds above 50 mph to enhance downforce.
With new innovations, the most advanced LC ever keeps you even more connected to the driving experience.

The latest innovations are right at your fingertips with a Remote Touchpad® that gives you access to multimedia, climate controls and Navigation® through a 10.3-inch high-resolution display. With Amazon Alexa® compatibility, thousands of the same skills you enjoy at home can now be conveniently accessed in your vehicle. Apple CarPlay™ integration provides seamless connection to your favorite iPhone® apps. While Lexus Enform®, our premium suite of connected technology, offers added service, security and entertainment, and remote access through your smartphone or smartwatch.

TECHNOLOGY

THE LEADING EDGE.
OF YOUR SEAT.

Now with Apple CarPlay compatibility, Wi-Fi and other advancements, you’ll be more connected than ever.

Driving the LC won’t be the only source of your entertainment, starting with onboard Wi-Fi™ that enables up to five different devices to connect online. Apple CarPlay® allows you to seamlessly integrate the same familiar interface from your iPhone® through the multimedia display of the LC. Simply connect your iPhone to get directions, make calls, or send and receive messages via Siri® and get access to your favorite apps like Spotify®, Audible® and Apple Podcasts™.

With Amazon Alexa®, all the convenience of an Alexa device at home can now be enjoyed in your vehicle. Using only your voice, you can listen to audiobooks, stream Amazon Music™, make lists, check the weather, get news briefings and more. Alexa even syncs to your Navigation System to provide on-the-go recommendations.
MARK LEVINSON® AUDIO SYSTEM

While most audio systems are adapted to and installed in a vehicle after it’s produced, Mark Levinson® technicians work alongside Lexus engineers from the onset of the development process. That’s why the LC features a rich, dynamic, 13-speaker, 915-watt sound stage uniquely fitted to the cabin—and as pure as the performance of the vehicle itself.

LEXUS CLIMATE CONCIERGE

Lexus Climate Concierge integrates climate controls with the heated and ventilated seating and is easily controlled by a single switch on the Lexus Climate Concierge monitor. The system also pairs with the available heated leather-trimmed steering wheel to offer a warm surface for the entire circumference of the steering wheel, regardless of the placement of the driver’s hands.

COLOR HEAD-UP DISPLAY

Designed to help minimize driver distraction, the available full-color Head-Up Display projects a range of essential navigation, safety and performance info directly onto the windshield, including audio, speed, current gear, rpm and more.

DRIVE MODE SELECT

Inspired by the iconic LFA supercar, controls are positioned on the outer instrument panel for seamless operation and our most engaging Drive Mode Select yet. Sport S mode alters the powertrain for a more dynamic throttle response. Sport S+ mode takes it further, modifying the Adaptive Variable Suspension that allows the driver to harness the engine’s power like never before.
PEACE OF MIND, STANDARD

Presenting Lexus Safety System+, an integrated suite of the most advanced active safety equipment ever offered on the LC.²⁰

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION
This system²¹ is engineered to help detect a vehicle or a pedestrian²² in the path of your Lexus under certain conditions. Should it detect a potential frontal collision, it’s designed to automatically prepare Brake Assist²³ for increased brake force and, in some cases, can even automatically brake the vehicle to a stop.

LANE DEPARTURE ALERT WITH LANE KEEP ASSIST
This system²⁴ utilizes a camera to monitor visible lane markings. If an inadvertent or potential lane departure is detected, it’s designed to warn you and can take slight corrective measures. And, if Dynamic Radar Cruise Control²⁵ is engaged, the system can even help you remain in the center of the visibly marked lane, helping to prevent drifting before it occurs.

ALL-SPEED DYNAMIC RADAR CRUISE CONTROL
This system²⁵ uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. Whether at highway speeds or in stop-and-go traffic, the system is designed to detect if you get closer than the preset distance and automatically slow your vehicle—even to a complete stop. If driving at highway speeds and the road ahead clears, your Lexus returns to its preset speed.

INTELLIGENT HIGH BEAMS
To help provide greater visibility for you as well as other drivers, Intelligent High Beams²⁶ offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it detects the headlamps or taillamps of vehicles ahead.

PACKAGES

CONVENIENCE PACKAGE
Intuitive Parking Assist™
Blind Spot Monitor™ with Rear Cross-Traffic Alert™

ALL-WEATHER PACKAGE
Heated leather-trimmed steering wheel
Windshield wiper de-icer
Electronic heater (LC 500h)

TOURING PACKAGE
Includes Convenience Package, plus:
Semi-aniline leather-trimmed front seats
Alcantara® headliner
Mark Levinson® 13-speaker, 915-watt Reference Surround Sound Audio System

SPORT PACKAGE
Includes Convenience Package, plus:
Eight-way power front sport seats with Alcantara® inserts
Carbon fiber roof or glass roof

PERFORMANCE PACKAGE
Includes Sport Package (with carbon fiber roof), plus:
Active Rear Steering
Variable Gear-Ratio Steering
Speed-activated rear wing
Alcantara® headliner
Carbon fiber door scuff plates

INDIVIDUAL OPTIONS
TORSEN® limited-slip rear differential
Head-Up Display
Mark Levinson® 13-speaker, 915-watt Reference Surround Sound Audio System

ACCESSORIES

CARBON FIBER REAR SPOILER
This lightweight spoiler intensifies the aerodynamic presence of your LC.

CARBON FIBER LOWER GRILLE INSERT
Enhance the look of your LC while complementing the available carbon fiber roof and rear spoiler.

ALL-WEATHER TRUNK TRAY
Removable for easy cleaning, this durable tray helps preserve your original carpet.

SPIDER CARGO NET
Help keep objects organized and in place with this innovative cargo net.

CARPET TRUNK MAT
Keep your trunk looking like new with this precise-fitting mat.

ALL-WEATHER FLOOR LINERS
Tub-style perimeter design provides optimal protection and an ideal fit.

ILLUMINATED DOOR SILLS
These sills help preserve your vehicle’s appearance and feature an elegant LED-illuminated Lexus logo.
